1 I believe that Yucca Mountian is unsafe as a repository for the country's nuclear
 waste. The ten thousand year guarantee that is used in reference to Yucca Mountian as
 2 a safe repository for nuclear waste does not reflect the potential hazards (geologic
 faults, faulty vessels) that could impact the site. Nuclear power is
 uneconomical (billions of taxpayer dollars have been used to subsidize the nuclear
 industry). Nuclear power waste is a nightmarish legacy that we are leaving for untold
 generations. Why is the government (DOE) even involved in the disposal of waste from
 a supposed private industry? Greed, ignorance, and lack of fiscal responsibility are the
 reasons why the taxpayers of this country are subsidizing the most
 uneconomical, unsafe, and uneconomical power ever produced by this country. Whoever
 reads this, what is your role in this catastrophe?
